said arms being engaged with and supported on said upper side portion of said primary spectacle frame so as to allow said auxiliary spectacle frame to be stably supported on said primary spectacle frame and so as to prevent said auxiliary spectacle frame from moving downward relative to said primary spectacle frame and so as to prevent said auxiliary spectacle frame from being disengaged from said primary spectacle frame.

**REMARKS**

Claims 1-66 are pending in the application. Claim 1 has been revised and returned to its original form. Thus, upon entry of the above Amendment, reissue claim 1 will be identical to claim 1 of U.S. Patent 5,568,207. Entry and reconsideration are respectfully requested.

Applicant, on November 22, 2000, filed a response to the Examiner's July 15, 1999 Office Action. In that response, Applicant argued that the Examiner's rejections are improper, and should be withdrawn. Applicant hereby reaffirms those arguments.
